

ROHIT DINDE

Computer Engineer | Aspiring SOC Analyst | Cybersecurity & DevOps Enthusiast

8219695415 | rohitdinde30@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Computer Engineering graduate with Google Cybersecurity and Oracle Cloud certifications, a published research paper, and a hands-on security project portfolio — including log analysis, network detection, packet inspection, and vulnerability scanning. Paired with 18+ months of experience in ticket-driven, SLA-compliant support roles. Seeking SOC Analyst L1 / Security Analyst role to apply technical foundation, certified knowledge, and operational discipline.

CERTIFICATIONS

- Google Cybersecurity Professional — Google (Jul 2025)
- Oracle Certified Professional — Oracle Cloud Infrastructure Data Science (Oct 2025)
- Claude Code in Action — Anthropic (Apr 2026)

TECHNICAL SKILLS

- Security: Log analysis & attack detection, network traffic/packet analysis, vulnerability & port scanning, SQL injection tooling (open-source contribution), SIEM
- Tools & Platforms: Git/GitHub, Linux fundamentals, network scanning tools (Nmap-based), automation/AI dashboard tooling
- Currently pursuing: TryHackMe SOC Level 1 path, Cisco Introduction to Cybersecurity

PROFESSIONAL EXPERIENCE

Technical Support Associate — IESG Labs

Nov 2025 – Jun 2026

- Resolved technical issues via ticketing systems, maintaining SLA compliance under time pressure
- Handled escalations requiring structured troubleshooting, root-cause identification, and clear documentation
- Self-directed lab practice alongside role: VPN kill-switch validation, iptables traffic containment rules, and WireGuard tunnel testing on Kali Linux / Parrot Security OS

Process Associate — WNS

Aug 2024 – Dec 2024

- Managed high-volume customer interactions in a process-compliant, quality-monitored environment

Operations — Tech Mahindra

Dec 2023 – Jun 2024

- Call center operations with strict adherence to process, compliance, and quality standards

PROJECTS / SECURITY & OPEN SOURCE

- Log Analyzer — Attack Detection:** Built a log parsing tool to identify attack patterns and anomalies, directly applicable to SOC log analysis work.
github.com/Rohit30Confluence/log-analyzer-attack-detection
- NDAP (Network Detection and Analysis Platform):** Developed a platform for network traffic detection and analysis.
github.com/Rohit30Confluence/ndap
- Packet Sniffer Analyzer:** Network packet capture and analysis tool for traffic inspection.
github.com/Rohit30Confluence/PacketSnifferAnalyzer
- Mini Scanner:** Network scanner inspired by Nmap (open-source) for port/service discovery.
github.com/Rohit30Confluence/mini-scanner
- Sovereign:** AI-driven automation tool with dashboard for workflow/process automation.
github.com/Rohit30Confluence/sovereign

EDUCATION

B.E., Computer Engineering — Sinhgad College of Engineering

Jul 2019 – Jan 2025 | Grade: A | Savitribai Phule Pune University
